## 3 deep-dives you should really read

### Teaming up to create multi-orbit broadband

Space News – Satellite / Launch · Topic: **Space/Infra**

- **What it is:** A collaboration or partnership focused on developing integrated multi-orbit satellite broadband services by leveraging different satellite altitudes for enhanced global connectivity.
- **Who:** Major satellite operators, particularly SES following its Intelsat acquisition, are key actors driving efforts to combine various satellite network capabilities.
- **What it does:** Introduces unified broadband services by combining satellites in GEO, MEO, and LEO, aiming for improved coverage, resilience, and reduced latency across diverse applications globally.
- **Why it matters:** Explains impact for Telco/Media/AI decision-makers.
- **Strategic view:** Track how this evolves across Space/Infra.

### Spotting smaller wildfires sooner than ever

Space News – Satellite / Launch · Topic: **Space/Infra**

- **What it is:** A new satellite technology or service focused on enhanced, early detection of smaller wildfires.
- **Who:** MUON SPACE, Earth Fire Alliance, and their FireSat Protoflight satellite.
- **What it does:** It provides significantly earlier and more precise detection of nascent wildfires, even those missed by current satellite systems.
- **Why it matters:** Explains impact for Telco/Media/AI decision-makers.
- **Strategic view:** Track how this evolves across Space/Infra.

### Nokia CTO wades in on physical AI

Fierce Telecom · Topic: **Telco/5G**

- **What it is:** A technology trend and network evolution discussion from Nokia's CTO regarding future AI integration into physical systems.
- **Who:** Nokia's CTO is the primary voice, highlighting future demands from industries adopting physical AI robots.
- **What it does:** It emphasizes that 5G networks must evolve to deliver microsecond-level decision support for physical AI robots in industrial settings.
- **Why it matters:** Explains impact for Telco/Media/AI decision-makers.
- **Strategic view:** Track how this evolves across Telco/5G.
