## 3 deep-dives you should really read

### Here's What You Should Know About Launching an AI Startup

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** AI startups are encountering unexpected challenges in transforming impressive AI models into genuinely useful and commercially viable products for the market.
- **Who:** Emerging Artificial Intelligence startups and their founders are discovering significant unexpected hurdles in productizing advanced AI models effectively for widespread adoption.
- **What it does:** This trend reveals the significant operational and market challenges faced by AI startups attempting to commercialize sophisticated AI models into viable, user-friendly products.
- **Why it matters:** This matters because it signals a crucial disconnect between theoretical AI model capabilities and their practical, scalable application, impacting investment strategies and market expectations.
- **Strategic view:** TMT executives must recognize AI productization complexity, emphasizing practical application challenges, disciplined investment, and a clear path to market value over purely technical model brilliance.

### Huge Trove of Nude Images Leaked by AI Image Generator Startup's Exposed Database

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** A significant breach occurred where an AI image generator startup's exposed database leaked over a million real and "nudified" images.
- **Who:** An unidentified AI image generation startup is responsible for exposing a vast database of personal and algorithmically manipulated images.
- **What it does:** This database exposure severely compromised the privacy and data security of numerous individuals whose images were either stored or algorithmically altered.
- **Why it matters:** The incident highlights critical security vulnerabilities and ethical challenges inherent in AI image generation and data handling practices across the industry.
- **Strategic view:** Telco, Media, and Tech leaders must prioritize robust data governance, AI ethics, and cybersecurity to mitigate reputational damage and regulatory risks in evolving digital landscapes.

### Check Out Highlights From WIRED's 2025 Big Interview Event

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** WIRED's 2025 Big Interview Event gathered prominent leaders from technology, business, culture, and science for comprehensive discussions on future trends.
- **Who:** WIRED, a leading technology and business publication, organized this influential event featuring top figures across various key industries.
- **What it does:** It facilitates high-level discussions among diverse industry leaders, providing insights into emerging trends and potential disruptions shaping the future landscape.
- **Why it matters:** This event offers C-level executives early access to expert perspectives and foresight into cross-sector innovations and strategic challenges relevant for TMT industries.
- **Strategic view:** TMT leaders should monitor insights from such influential platforms to anticipate market shifts, identify partnership opportunities, and refine their long-term innovation roadmaps.
