Hiring specialists made sense before AI — now generalists win

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** This article argues that the rapid evolution driven by AI demands a shift from hiring specialized talent to prioritizing adaptable generalists who can navigate diverse technical domains.
- **Who:** Tony Stoyanov, CTO and co-founder of EliseAI, authored this piece highlighting the transformative impact of AI on workforce requirements in technology companies.
- **What it does:** It advocates for companies to embrace a new talent model focused on generalists capable of rapid learning and cross-functional problem-solving, rather than deep specialists, given AI's accelerated innovation pace.
- **Why it matters:** This matters because the accelerated pace of AI-driven technological change is fundamentally redefining essential skills and organizational structures, demanding a strategic re-evaluation of talent acquisition and development.
- **Strategic view:** C-level executives must strategically prioritize cultivating a workforce of adaptable generalists and fostering an organizational culture that rewards continuous learning and cross-disciplinary agility to thrive in the AI era.

Artemis II Crew Rehearse Launch Day Demonstration

NASA – Breaking News · Topic: **AI/Cloud/Quantum**

- **What it is:** NASA's Artemis II crew, comprising four astronauts, recently conducted a full dress rehearsal at Kennedy Space Center in preparation for their lunar orbital test flight scheduled for December 2025.
- **Who:** The Artemis II mission involves a multinational crew, including NASA astronauts Victor Glover and Reid Wiseman, alongside CSA astronaut Jeremy Hansen, preparing for their historic lunar journey.
- **What it does:** This dress rehearsal simulates critical launch day procedures, ensuring the crew and ground support systems are fully prepared for the complex operations required for deep space exploration.
- **Why it matters:** The rigorous rehearsal is crucial for validating operational readiness, identifying potential issues, and ensuring crew safety and mission success for humanity's return to lunar orbit.
- **Strategic view:** This milestone underscores accelerating advancements in space capabilities, highlighting growing commercial opportunities for Telco, Media, and Tech in lunar infrastructure, communications, and scientific data monetization.
