## 3 deep-dives you should really read

### 'Intelition' changes everything: AI is no longer a tool you invoke

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Intelition represents the continuous co-production of decisions, logic, and actions where human and machine intelligence operate together within a shared enterprise model, transcending traditional AI invocation.
- **Who:** This emerging paradigm involves enterprises adopting unified ontologies, tech giants like Palantir, Google, Meta, and Apple advancing AI models, and consumers engaging through personal AI interfaces.
- **What it does:** It unifies enterprise data through shared ontologies, enables AI models to continually learn and accumulate understanding, and introduces always-on personal interfaces for collaborative decision-making and action.
- **Why it matters:** This shift moves AI from an invoked feature to an integrated, continuous operating principle, fundamentally altering human-machine interaction, enterprise data utilization, and the development of intelligent applications.
- **Strategic view:** Telco, Media, and Tech leaders must invest in unified ontology platforms, perpetual learning AI, and privacy-centric personal intelligence devices to capture market value and redefine future intelligent services.
