OpenAI report reveals a 6x productivity gap between AI power users and everyone else

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** OpenAI's report shows a significant productivity chasm in enterprise AI adoption, where a small group of power users vastly outperforms the majority in their daily work.
- **Who:** OpenAI and MIT researchers are observing a productivity gap among enterprise employees across various industries, impacting how companies achieve returns on AI investments.
- **What it does:** This report highlights how intensive, habitual AI usage by a few individuals is creating a new workplace stratification, widening the performance gap within organizations despite universal tool access.
- **Why it matters:** The uneven distribution of AI productivity gains means most enterprise AI investments yield little return, creating a competitive disadvantage for companies failing to cultivate widespread adoption and proficiency.
- **Strategic view:** Executives must pivot from merely providing AI tools to actively fostering a culture of pervasive, experimental AI integration to unlock transformative productivity and prevent internal competitive stratification.
