3 deep-dives you should really read

MIT's AI Robotics Lab Director Is Building People-Centered Robots

IEEE Spectrum – Robotics · Topic: **Robotics/Automation**

- **What it is:** This news highlights a significant research trend focused on developing human-amplifying, people-centered robotics and AI.
- **Who:** Daniela Rus, director of MIT's CSAIL, is the central figure, recognized by IEEE for pioneering contributions in modern robotics.
- **What it does:** It introduces a paradigm for robotics that enhances human capabilities, providing "superpowers" rather than replacing human roles.
- **Why it matters:** Explains impact for Telco/Media/AI decision-makers.
- **Strategic view:** Track how this evolves across Robotics/Automation.

A New Industrial Age in Orbit

Space News – Satellite / Launch · Topic: **Space/Infra**

- **What it is:** This news highlights a significant paradigm shift towards a more efficient and industrial approach to building and operating space missions, moving beyond traditional, slow methods.
- **Who:** Traditional aerospace primes and emerging space technology companies are involved, shifting from bespoke, slow mission development to standardized, cost-efficient industrial models.
- **What it does:** It enables the rapid development, cost reduction, and increased accessibility of space missions through industrialization, fostering innovation in satellite manufacturing and in-orbit services.
- **Why it matters:** Explains impact for Telco/Media/AI decision-makers.
- **Strategic view:** Track how this evolves across Space/Infra.

ARTE adds Ukrainian public broadcaster to partner network

Broadband TV News · Topic: **TV/Streaming**

- **What it is:** A new partnership agreement expanding a European cultural channel's broadcaster network.
- **Who:** ARTE, the European cultural channel, and Suspilne Ukraine, the Ukrainian public broadcaster.
- **What it does:** ARTE expands its partner network, integrating Suspilne Ukraine to enhance European cultural content exchange and reach.
- **Why it matters:** Explains impact for Telco/Media/AI decision-makers.
- **Strategic view:** Track how this evolves across TV/Streaming.
