## 3 deep-dives you should really read

### Z.ai debuts open source GLM-4.6V, a native tool-calling vision model for multimodal reasoning

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Z.ai's GLM-4.6V is an open-source vision-language model featuring native tool-calling for multimodal reasoning, optimized for both cloud and edge deployments.
- **Who:** Chinese AI startup Zhipu AI, also known as Z.ai, has developed and released this new generation of open-source vision-language models.
- **What it does:** The models offer native function calling with visual inputs, multimodal reasoning, frontend automation, and long-context processing for diverse enterprise applications.
- **Why it matters:** Its MIT license enables flexible enterprise integration and deployment, while competitive performance across benchmarks offers a powerful, cost-effective alternative to proprietary solutions.
- **Strategic view:** This open-source, tool-calling VLM empowers TMT firms to accelerate automation, enhance product innovation with visual AI, and reduce dependency on costly closed-source multimodal platforms.

### Tracking every decision, dollar and delay: The new process intelligence engine driving public-sector progress

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Process intelligence (PI) combined with AI provides real-time operational visibility into complex organizational workflows, identifying hidden inefficiencies and compliance issues across various systems.
- **Who:** Celonis, a market leader in process intelligence, is spearheading the adoption of this technology, showcasing its capabilities in public sector and aiming for broader enterprise application.
- **What it does:** The technology analyzes vast datasets to uncover bottlenecks, prevent inappropriate spending, and enable data-driven decision-making, significantly improving accountability and resource allocation.
- **Why it matters:** This approach shifts from reactive auditing to proactive optimization, delivering substantial cost savings, enhancing operational agility, and empowering organizations with immediate, actionable insights.
- **Strategic view:** TMT executives should leverage PI and AI to transform complex service delivery, ensure compliance across distributed operations, and gain a competitive edge through unprecedented operational clarity and efficiency.

### Anthropic's Claude Code can now read your Slack messages and write code for you

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Anthropic's Claude Code, an AI programming agent, now offers a beta integration directly into Slack, enabling automated code generation and task management.
- **Who:** Anthropic, a leading AI developer, is expanding its enterprise footprint by embedding its Claude Code agent into core communication platforms like Slack.
- **What it does:** The system automatically analyzes Slack messages for coding tasks, initiates a Claude Code session, and then writes and posts code solutions or pull requests.
- **Why it matters:** This integration significantly enhances developer productivity by streamlining workflows, reducing context switching, and accelerating the resolution of software development issues.
- **Strategic view:** This move deepens AI's embedding into enterprise workflows, driving efficiency gains and solidifying conversational AI as a pivotal interface for automated software development in TMT sectors.
