## 3 deep-dives you should really read

### While everyone talks about an AI bubble, Salesforce quietly added 6,000 enterprise customers in 3 months

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Salesforce's Agentforce, an autonomous AI agent platform for enterprises, rapidly expanded its customer base by 6,000 in one quarter, reaching 18,500 clients.
- **Who:** Salesforce, a leading enterprise software provider, is the primary actor, showcasing its successful deployment of AI solutions for business workflows.
- **What it does:** It deploys production-grade agentic AI systems that automate complex workflows, process data securely, and make decisions with integrated trust layers.
- **Why it matters:** This growth signals that despite AI bubble concerns, enterprise AI solutions delivering measurable business outcomes are gaining significant traction and trust.
- **Strategic view:** TMT executives should prioritize investing in secure, governed enterprise AI platforms that build trust and deliver tangible ROI, rather than merely experimenting with general AI.

### How Elon Musk Won His No Good, Very Bad Year

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** Elon Musk navigated a financially challenging year for Tesla, impacted by political involvement and cryptocurrency, but successfully shifted focus to SpaceX.
- **Who:** Elon Musk, the billionaire CEO behind Tesla and SpaceX, is assessed for his complex business maneuvers in a challenging year.
- **What it does:** Musk's controversial engagements and focus on Dogecoin adversely impacted Tesla's profitability, yet he successfully advanced SpaceX's initiatives despite these challenges.
- **Why it matters:** This case highlights how a leader's personal brand and diversions can significantly influence a company's financial health, while also demonstrating strategic pivots to other ventures.
- **Strategic view:** TMT executives should note the significant dual impact of a founder's personal brand and diversified attention on core business stability and future venture success.

### Welcome to Kenya's Great Carbon Valley: a bold new gamble to fight climate change

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** The "Great Carbon Valley" is a strategic initiative in Kenya near Lake Naivasha, aiming to combat climate change through novel geothermal energy and carbon capture solutions.
- **Who:** The initiative involves the Kenyan government and private entities, specifically targeting the geothermal-rich Lake Naivasha region for development.
- **What it does:** It establishes a hub for developing and deploying advanced geothermal energy production combined with innovative carbon capture and storage technologies.
- **Why it matters:** This project represents a pioneering, potentially high-impact model for developing nations to lead global climate change mitigation efforts.
- **Strategic view:** TMT executives should monitor this initiative for new infrastructure investment opportunities, technology partnerships in green energy, and potential market creation in climate tech solutions.
