3 deep-dives you should really read

Nokia CTO wades in on physical AI

Fierce Telecom · Topic: **Telco/5G**

- **What it is:** Nokia CTO highlights evolving network demands for "physical AI" integration within industrial settings.
- **Who:** Nokia, via its CTO, is the primary actor defining future 5G network needs for industrial physical AI.
- **What it does:** It defines ultra-low latency (microseconds) 5G as critical for real-time decision-making in industrial physical AI robots.
- **Why it matters:** This matters for Telco/Media/Tech decision-makers because it highlights a tangible technology or market shift that could influence strategy, investments or competitive positioning.
- **Strategic view:** Monitor how this story evolves over the next 6-18 months and assess implications for your roadmap, partnerships and telco/5g investments.

Akamai gears up for edge AI with new inference cloud

Fierce Telecom · Topic: **Telco/5G**

- **What it is:** Product launch and strategic market entry into the rapidly growing edge AI inference market segment.
- **Who:** Akamai Technologies, a leading content delivery network (CDN) and cloud security provider.
- **What it does:** Akamai Inference Cloud provides distributed computing infrastructure for running AI inference models closer to the network edge.
- **Why it matters:** This matters for Telco/Media/Tech decision-makers because it highlights a tangible technology or market shift that could influence strategy, investments or competitive positioning.
- **Strategic view:** Monitor how this story evolves over the next 6-18 months and assess implications for your roadmap, partnerships and telco/5g investments.

Cisco: Service provider market is 'recovering nicely'

Fierce Telecom · Topic: **Telco/5G**

- **What it is:** A positive market trend report from Cisco indicating a strong recovery in global service provider spending.
- **Who:** Cisco, as the reporting vendor, and global service providers, who are increasing their capital expenditures.
- **What it does:** It signals a rebound in service provider capital expenditure, driven by essential network refreshes and infrastructure investments for AI and data center connectivity demands.
- **Why it matters:** This matters for Telco/Media/Tech decision-makers because it highlights a tangible technology or market shift that could influence strategy, investments or competitive positioning.
- **Strategic view:** Monitor how this story evolves over the next 6-18 months and assess implications for your roadmap, partnerships and telco/5g investments.
