## 3 deep-dives you should really read

### Hiring specialists made sense before AI — now generalists win

VentureBeat - AI · Topic: AI/Cloud/Quantum

- **What it is:** The article suggests that the rapid pace of AI innovation renders traditional hiring of deep specialists less effective, advocating for a pivot towards adaptable generalists instead.
- **Who:** C-level executives and hiring managers across Telco, Media, and Tech sectors are the primary audience, needing to reassess their talent strategies for the AI-driven economy.
- **What it does:** It champions generalists who possess breadth without losing depth, enabling them to bridge engineering, product, and operations, making quick decisions with imperfect information.
- **Why it matters:** This shift matters because rigid organizational structures and an overreliance on specialists hinder innovation, making companies vulnerable in an era where agility and broad contextual understanding are paramount.
- **Strategic view:** Executives must strategically foster a culture of continuous learning and empower generalists with ownership, promoting adaptability and agency to build resilient, future-ready organizations capable of leveraging AI effectively.

### WIRED Roundup: The 5 Tech and Politics Trends That Shaped 2025

Wired - Business · Topic: AI/Cloud/Quantum

- **What it is:** This Wired Roundup from the 'Uncanny Valley' podcast summarizes five key technology and political trends that significantly influenced the year 2025.
- **Who:** Wired, through its 'Uncanny Valley' podcast, provides analysis of the intersection of technology and politics for a business-focused executive audience.
- **What it does:** It analyzes major tech and political stories, ranging from artificial intelligence to cryptocurrency, to understand 2025 and forecast potential developments for 2026.
- **Why it matters:** Understanding these aggregated trends is crucial for C-level executives to grasp the evolving market dynamics and prepare for future technological and regulatory shifts in 2026.
- **Strategic view:** Executives must leverage this trend analysis to proactively shape strategic roadmaps, identify emerging opportunities, and mitigate risks within the converging tech and political landscapes.

### Artemis II Crew Rehearse Launch Day Demonstration

NASA - Breaking News · Topic: AI/Cloud/Quantum

- **What it is:** This is a dress rehearsal for NASA's Artemis II crew, practicing their launch day procedures and departure from Kennedy Space Center for their upcoming lunar test flight.
- **Who:** Four astronauts from NASA and the Canadian Space Agency, comprising the Artemis II crew, are actively participating in this critical launch day demonstration.
- **What it does:** This demonstration simulates the crew's departure from the operations building, refining procedures and ensuring seamless execution for the actual Artemis II launch around the Moon.
- **Why it matters:** This rehearsal is vital for de-risking the actual launch, verifying crew readiness, and ensuring the complex operational procedures are perfectly synchronized for a safe lunar mission.
- **Strategic view:** This mission underscores the burgeoning commercial space economy's reliance on advanced communications, sophisticated data processing, and immersive media platforms, creating significant innovation and infrastructure opportunities for Telco, Media, and Tech.
