## 3 deep-dives you should really read

### AI denial is becoming an enterprise risk: Why dismissing “slop” obscures real capability gains

VentureBeat – AI · Topic: AI/Cloud/Quantum

- **What it is:** The article warns that dismissing AI's rapid advancements and tangible business value as mere "slop" or a hype bubble constitutes a significant and dangerous enterprise risk for organizations.
- **Who:** A seasoned computer scientist and research engineer cautions C-level executives and the broader TMT sector against public and influencer-driven "AI denial."
- **What it does:** The piece underscores AI's accelerating capabilities and growing enterprise adoption, predicting its imminent surpassing of human cognitive and emotional intelligence in many critical areas.
- **Why it matters:** This matters because AI denial leads to underinvestment and strategic unpreparedness, risking competitive obsolescence and vulnerability to powerful, manipulative AI systems challenging human cognitive supremacy.
- **Strategic view:** C-level executives must overcome skepticism and integrate advanced AI strategically, proactively preparing for profound organizational and societal shifts driven by its rapid, transformative, and potentially disruptive progress.

### Here's What You Should Know About Launching an AI Startup

Wired – Business · Topic: AI/Cloud/Quantum

- **What it is:** This news highlights the significant and often underestimated challenges faced by AI startups in transforming sophisticated AI models into practical, market-ready products.
- **Who:** AI startup founders and their teams are the primary focus, grappling with the complexities of product development and commercialization beyond core AI model creation.
- **What it does:** It details how the journey from a 'dazzling AI model' to a 'useful product' is proving far more difficult and demanding than anticipated by many in the industry.
- **Why it matters:** This matters to TMT executives by underscoring the critical importance of productization, operational execution, and market fit when evaluating AI investments, rather than just technological prowess.
- **Strategic view:** TMT leaders should strategically focus on robust product development cycles, market validation, and integration capabilities for AI ventures, not solely on breakthrough model innovation.
