## 3 deep-dives you should really read

### [Hiring specialists made sense before AI — now generalists win](#)

VentureBeat - AI · Topic: [AI/Cloud/Quantum](#)

- **What it is:** The article posits that the rapid acceleration of technological change due to AI necessitates a shift in talent strategy, favoring adaptable generalists over deep specialists.
- **Who:** Technology companies, previously focused on hiring staff-level specialists, are now urged to seek generalists who can adapt quickly across diverse technical domains.
- **What it does:** AI adoption lowers technical barriers for complex work but demands individuals who can quickly bridge engineering, product, and operations to solve multifaceted problems.
- **Why it matters:** This paradigm shift matters because companies clinging to rigid specialist roles risk falling behind, as rapid AI evolution demands agility and broad problem-solving capabilities.
- **Strategic view:** TMT executives must strategically re-evaluate talent acquisition and development, prioritizing adaptable generalists with cross-functional range and ownership to navigate AI-driven market volatility.

### [Artemis II Crew Rehearse Launch Day Demonstration](#)

NASA - Breaking News · Topic: [AI/Cloud/Quantum](#)

- **What it is:** This is a critical launch day demonstration rehearsal conducted by the Artemis II crew, simulating procedures for their upcoming lunar mission.
- **Who:** The four-member Artemis II crew, comprising NASA and CSA astronauts, actively participates in this essential simulated launch day procedure.
- **What it does:** The crew practices vital launch day procedures and emergency protocols during this full-scale demonstration to ensure readiness for their spaceflight.
- **Why it matters:** This rehearsal is crucial for validating all pre-launch operations and crew readiness, significantly enhancing safety and the likelihood of a successful lunar mission.
- **Strategic view:** This demonstration represents a significant step forward in preparing for humanity's return to the Moon and subsequent journeys to Mars under the Artemis program.
