3 deep-dives you should really read

Alibaba's proprietary Qwen3.7-Max can run for 35 hours autonomously and supports external harnesses like Anthropic's Claude Code

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Alibaba's Qwen3.7-Max is a powerful, proprietary AI model specifically engineered for long-duration autonomous agentic tasks, marking a significant entry into the advanced AI agent era.
- **Who:** Developed by Alibaba's renowned Qwen Team, this advanced AI model solidifies the Chinese e-commerce giant's position as a serious contender in the global frontier AI race.
- **What it does:** Qwen3.7-Max operates autonomously for up to 35 hours, excelling at complex tasks like code optimization and enterprise simulations, and seamlessly integrates with diverse agent frameworks through API protocols.
- **Why it matters:** This model pushes the boundaries of autonomous AI agents with extended endurance and high performance, intensifying global AI competition while offering enterprises a powerful, cost-effective alternative.
- **Strategic view:** Qwen3.7-Max signifies a strategic shift toward long-duration, autonomous enterprise AI agents, challenging Western leaders, but its China-based access creates data sovereignty and compliance hurdles for global adoption.
