Some Electricians Think Building Data Centers Is for Sellouts

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** A growing sentiment among some electricians labels working on new data center construction as ethically compromising, fueled by increasing public opposition.
- **Who:** Big Tech companies are aggressively funding data center expansions, while some electricians, crucial to construction, are expressing ethical reservations about the work.
- **What it does:** This ethical stance risks creating skilled labor shortages and escalating social license challenges for crucial data center infrastructure projects globally.
- **Why it matters:** This trend indicates escalating operational risks, including project delays and cost overruns, for critical digital infrastructure underpinning all TMT growth initiatives.
- **Strategic view:** Executives must strategically integrate community engagement and workforce sustainability into infrastructure planning to mitigate escalating reputational and development risks.

Inside the world's deepest and longest subsea road tunnel

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** This refers to the construction and operational environment of the world's deepest and longest subsea road tunnel located under the North Sea.
- **Who:** This involves the engineers, construction firms, and governmental bodies responsible for developing and maintaining critical subsea infrastructure projects.
- **What it does:** It establishes vital transportation links and connectivity for people and goods, overcoming significant geographical and environmental barriers at extreme depths.
- **Why it matters:** This project demonstrates cutting-edge engineering capabilities for extreme environments, enhancing regional connectivity and setting new benchmarks for infrastructure development.
- **Strategic view:** This signifies advanced infrastructure potential for critical data backbone deployment, enhancing network resilience, and enabling future technology solutions in challenging, extreme environments.
