Here's how our climate team picked 10 promising companies to watch

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** This is MIT Technology Review's annual selection process identifying the top ten most promising climate technology companies to watch.
- **Who:** MIT Technology Review's climate team meticulously researches and evaluates innovative companies for their influential annual list.
- **What it does:** It spotlights a curated list of emerging climate tech ventures poised for significant impact and future growth in environmental solutions.
- **Why it matters:** This initiative offers critical insights into the evolving landscape of climate innovation, guiding potential investments and strategic partnerships.
- **Strategic view:** TMT executives should monitor this list for early indicators of market shifts, partnership opportunities, and disruptive technologies in the burgeoning climate sector.

X-energy and its helium-cooled nuclear reactors

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** X-energy is developing advanced small modular nuclear reactors designed to produce both electricity and high-temperature process heat for industrial applications.
- **Who:** X-energy is an energy technology company specializing in the development of next-generation nuclear power solutions, particularly small modular reactors.
- **What it does:** X-energy's helium-cooled small modular reactors provide consistent, high-temperature process heat and electricity specifically for energy-intensive industrial manufacturing.
- **Why it matters:** This technology addresses the critical need for high-temperature process heat in heavy industry, a demand not effectively met by intermittent renewable electricity sources.
- **Strategic view:** For TMT, X-energy's reactors offer a reliable, high-density power source for energy-intensive operations, supporting sustainability goals and potentially enabling new industrial infrastructure.

BasiGo and its fleet of electric buses

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** BasiGo is a pioneering company deploying electric buses across sub-Saharan Africa, aiming to replace diesel fleets with lower-emission alternatives.
- **Who:** BasiGo is an innovative climate technology company actively transitioning public transportation in sub-Saharan Africa towards sustainable electric vehicle fleets.
- **What it does:** BasiGo replaces tens of thousands of polluting diesel buses with electric vehicles, employing an accessible pay-as-you-drive model to facilitate widespread adoption.
- **Why it matters:** This initiative significantly reduces carbon emissions in public transport, simultaneously making electric vehicles more economically accessible and viable for African markets.
- **Strategic view:** This project signifies a significant market shift towards sustainable urban mobility in emerging economies, creating new opportunities for infrastructure development, digital payment systems, and data-driven services for TMT companies.
