The Pentagon wants \$30 million to build an AI-powered lie detector

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** The US Department of Defense is requesting \$30.3 million over five years for "Polygraph Next," an AI and machine learning-powered program aimed at creating an improved lie detection system.
- **Who:** The US Department of Defense (Pentagon) is leading this initiative, utilizing its budget request to fund advanced research and development in AI for national security applications.
- **What it does:** This program will develop advanced scoring algorithms using artificial intelligence and machine learning, alongside "standoff sensing" techniques, to create a more sophisticated lie detection system.
- **Why it matters:** This investment signifies a growing government reliance on AI for sensitive national security applications, potentially setting new standards for intelligence gathering and personnel vetting procedures.
- **Strategic view:** Telco, Media, and Tech companies should note the expanding government market for sophisticated AI and sensing technologies, indicating future opportunities and ethical challenges in data analysis and surveillance.

The Download: a bid to scrap the virtual wall and AI hits Climate Week

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** A US congressional representative has introduced legislation to terminate the nation's existing border surveillance tower program, often referred to as a virtual wall.
- **Who:** Democratic US Representative Delia Ramirez from Illinois is spearheading plans to introduce legislation targeting the current border surveillance tower infrastructure.
- **What it does:** The proposed legislation aims to dismantle the technological infrastructure currently comprising the United States' extensive border surveillance tower program.
- **Why it matters:** This initiative signals a potential pivot in government technology policy, significantly impacting future procurement and contracts for surveillance and border security solutions.
- **Strategic view:** TMT executives must recognize evolving government priorities and potential shifts in large-scale technological infrastructure investment and procurement strategies for national security applications.

There's a new way to break RSA that's faster than anything we've seen before

Ars Technica – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** This news concerns a development related to There's a new way to break RSA that's faster than anything we've seen before.
- **Who:** The main actors involved include Ars Technica – AI and ecosystem partners.
- **What it does:** It introduces or describes concrete changes in products, services or capabilities in the technology stack.
- **Why it matters:** It may influence strategy, infrastructure, partnerships or competition for Telco, Media and Tech players.
- **Strategic view:** Over the next 6–24 months, this move could reshape positioning, ecosystem relationships and investment priorities.
