3 deep-dives you should really read

When Claude changed, everything changed: Managing AI blast radius in production

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** This news concerns a development related to When Claude changed, everything changed: Managing AI blast radius in production.
- **Who:** The main actors involved include VentureBeat – AI and ecosystem partners.
- **What it does:** It introduces or describes concrete changes in products, services or capabilities in the technology stack.
- **Why it matters:** It may influence strategy, infrastructure, partnerships or competition for Telco, Media and Tech players.
- **Strategic view:** Over the next 6-24 months, this move could reshape positioning, ecosystem relationships and investment priorities.

Agentic AI solved coding — and exposed every other problem in software engineering

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Agentic AI now rapidly generates software code, exposing that traditional coding was not the core bottleneck in product development, which instead lies in higher-level engineering functions.
- **Who:** C-level executives, engineering leaders, and software development teams in Telco, Media, and Tech companies are directly impacted by this shift.
- **What it does:** It significantly accelerates code generation, but simultaneously magnifies challenges in defining requirements, integrating complex systems, ensuring accountability, and managing operational complexity.
- **Why it matters:** This shift highlights that rapid code output without strategic governance, appropriate metrics, and human upskilling leads to increased technical debt, runaway costs, and stalled product innovation.
- **Strategic view:** Leaders must implement robust AI governance, multi-model technical strategies, and reskill engineers for systems-thinking to avoid operational failures and ensure AI adoption drives genuine business value.
