Claude Code turned every engineer into three. Now companies need more product thinkers

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** AI-driven code generation tools, such as Claude Code, are drastically increasing software engineering productivity, effectively tripling output per engineer across organizations.
- **Who:** Companies adopting AI agentic workflows, especially software engineers and product managers, are experiencing a profound shift in their development processes.
- **What it does:** This shift moves the primary bottleneck from writing code to precisely defining what to build, highlighting a critical gap in product thinking and direction.
- **Why it matters:** It forces C-level executives to fundamentally rethink software development ratios, talent acquisition, and strategic allocation of product management resources for innovation velocity.
- **Strategic view:** TMT leaders must strategically reorient their organizations to foster deep product thinking alongside strong engineering fundamentals to maximize AI's transformative potential.
