Anthropic is bringing back Claude Fable 5 globally after US lifts export control order — where can enterprises access it?

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Anthropic has reinstated global availability for its powerful AI model, Claude Fable 5, following the U.S. government's withdrawal of emergency export control orders.
- **Who:** Anthropic, supported by major cloud hyperscalers, is making its flagship AI model available again after a regulatory reversal by the U.S. government.
- **What it does:** This action re-enables global enterprises to integrate Claude Fable 5 across Anthropic's ecosystem and cloud platforms for advanced AI applications, while Mythos 5 access remains limited.
- **Why it matters:** The reversal reasserts U.S. leadership in AI deployment speed and market access, addressing industry concerns that previous controls would disadvantage domestic technology providers.
- **Strategic view:** This event underscores the delicate balance between national security and global market competitiveness in frontier AI, influencing enterprise adoption strategies and the cost dynamics of advanced models.

The Control Gap: Enterprise AI organizations have an ownership problem, not a technology problem — and most are governing it by hand

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** The enterprise AI control gap describes the widening disparity between aggressive AI adoption and insufficient governance, visibility, and ownership across organizations, leading to operational failures.
- **Who:** C-level executives and senior technical leaders within large enterprises are struggling to govern their rapidly expanding AI portfolios effectively and safely.
- **What it does:** The lack of centralized AI ownership and automated governance leads to significant financial losses, operational failures, and an inability to detect unsafe or failing AI models in production.
- **Why it matters:** This control gap threatens to undermine enterprise AI investments, amplify operational risks, and impede strategic innovation due to unmanaged costs and undetected failures.
- **Strategic view:** C-level executives must prioritize establishing clear, centralized AI ownership and investing in automated cross-platform governance tools to bridge this critical control gap.

Restaurants can now accept orders placed directly from ChatGPT and Claude thanks to Square's new, low-fee, no setup integration

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Square launched a new integration enabling restaurants to accept direct orders from ChatGPT and Claude with low processing fees and no additional marketplace commissions.
- **Who:** Square, a Block company, is providing this service, targeting U.S.-based food and beverage sellers and consumers using prominent AI platforms like ChatGPT and Claude.
- **What it does:** The system allows customers to discover and place orders via AI chatbots, seamlessly integrating into Square's POS and bypassing high third-party aggregator fees.
- **Why it matters:** This initiative significantly reduces transaction costs for restaurants, empowering them with a more profitable direct-to-consumer channel compared to expensive delivery platforms.
- **Strategic view:** Square is strategically positioning itself at the forefront of AI-driven "agentic commerce," disrupting traditional marketplace models and expanding its ecosystem value for merchants.
