## 3 deep-dives you should really read

### The Download: the Pentagon's AI-powered lie detector and young organ limits

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** The Pentagon is investing \$30 million over five years into developing an advanced AI-powered lie detection system.
- **Who:** The United States Department of Defense, through the Pentagon, is funding this significant artificial intelligence research and development project.
- **What it does:** This initiative aims to create a more sophisticated and reliable lie detector by leveraging advanced artificial intelligence technologies for enhanced veracity assessment.
- **Why it matters:** It signals a significant governmental shift towards integrating artificial intelligence into sensitive national security and intelligence gathering operations.
- **Strategic view:** For TMT executives, this highlights robust defense sector investment in AI, indicating future market opportunities for advanced AI solutions and critical ethical AI governance discussions.

### Appeals Court Lets the Pentagon Designate Anthropic a Supply-Chain Risk

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** An appeals court upheld the Pentagon's decision to classify AI lab Anthropic as a supply-chain risk, rejecting the company's legal challenges.
- **Who:** A US appeals court panel sided with the Pentagon, allowing its designation of AI developer Anthropic as a critical supply-chain risk.
- **What it does:** This ruling allows the Pentagon to continue treating Anthropic as a potentially risky vendor, impacting its eligibility for future federal contracts.
- **Why it matters:** It sets a precedent for how governments can classify AI providers based on supply chain security concerns, impacting the entire industry.
- **Strategic view:** TMT executives must now consider heightened national security scrutiny on AI partnerships and supply chains, especially when engaging with critical government sectors.

### The Trump Administration Is Trying to Get Musk and X Out of a \$137 Million EU Fine

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** The Trump administration formally intervened in a legal challenge by Elon Musk's X Corp. against a substantial €137 million fine imposed by the European Union.
- **Who:** The US government, under the Trump administration, is aligning with Elon Musk's X against the European Union and its Digital Services Act enforcement.
- **What it does:** This intervention provides legal and diplomatic support for X's challenge, potentially weakening the EU's enforcement power over major tech platforms like X.
- **Why it matters:** This development signifies a potential international regulatory clash, challenging the EU's authority over foreign tech platforms and creating uncertainty for global digital service compliance.
- **Strategic view:** TMT executives should prepare for increased geopolitical friction impacting digital regulation, potentially leading to a balkanized internet where compliance varies significantly by jurisdiction and political alignment.
