## 3 deep-dives you should really read

### DeepSeek cut prices 75%. The 100x problem remains

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** The '100x problem' signifies that despite declining AI model prices, agentic AI systems consume vastly more tokens per user request, leading to disproportionately high inference costs.
- **Who:** Enterprise AI vendors, developers, and companies deploying advanced AI agent systems are grappling with this challenge, impacting their profitability and product architecture.
- **What it does:** Token amplification drives exponential increases in AI inference costs for agentic workflows, effectively breaking the traditional seat-based SaaS pricing model and eroding vendor gross margins.
- **Why it matters:** This issue fundamentally undermines the assumed economic viability of AI-native business models, making it difficult for vendors to profit from their most engaged, high-value users.
- **Strategic view:** To sustain profitability, C-level executives must prioritize robust agent orchestration, including cost-aware routing and context management, as a critical new competitive moat in AI deployment.

### ESA welcomes new UK space and defence gateway

ESA – European Space Agency · Topic: **Space/Infra**

- **What it is:** A new UK space and defence initiative, launched by King Charles III, aims to shape the future of the nation's critical space and defence economy from its largest space cluster.
- **Who:** King Charles III and the UK government, supported by industry at the UK's largest space cluster, are behind this new strategic defence and space initiative welcomed by ESA.
- **What it does:** This new gateway initiative is specifically designed to strategically shape the future trajectory and economic growth of the UK's vital space and defence industries and capabilities.
- **Why it matters:** This initiative underscores the UK's commitment to strengthening its strategic capabilities and economic competitiveness within the rapidly evolving global space and defence sectors.
- **Strategic view:** This new UK gateway signals increased government focus and investment, presenting TMT firms with significant opportunities in secure communication, advanced satellite technology, and data services integration within a growing sector.
