3 deep-dives you should really read

Google's Gemini can now run on a single air-gapped server — and vanish when you pull the plug

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** Cirrascale, in partnership with Google Cloud, now offers the full Gemini AI model on-premises as a private, air-gapped hardware appliance for secure deployment.
- **Who:** Cirrascale Cloud Services, Google Cloud, and hardware partners like Dell and Nvidia, are delivering this secured on-premises AI solution to regulated industries.
- **What it does:** This appliance enables enterprises and government agencies to run the advanced Gemini model completely disconnected from external networks, safeguarding sensitive data internally.
- **Why it matters:** It eliminates the long-standing dilemma for regulated sectors: access powerful AI models without compromising data control, thereby unlocking new secure generative AI applications.
- **Strategic view:** This on-premises, air-gapped deployment model signifies a pivotal reversal of cloud orthodoxy, empowering businesses with sovereign AI capabilities for highly sensitive workloads.
