3 deep-dives you should really read

The Download: AI "mind-reading" and creative uses for small batteries

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** A novel AI tool can interpret human brain scans to reconstruct visual stimuli a person is currently observing, essentially 'mind-reading' images.
- **Who:** Advanced AI research teams are pioneering tools capable of interpreting complex neurological data for visual reconstruction from human brain activity.
- **What it does:** This AI technology deciphers brain scan data to generate visual representations of objects or scenes an individual perceives in real-time.
- **Why it matters:** This capability signifies a major leap in brain-computer interface technology and raises profound questions regarding privacy and data security for individuals.
- **Strategic view:** TMT leaders must strategically address the profound ethical, regulatory, and privacy implications of advanced neuro-AI, while exploring potential future interface and content delivery paradigms.

Health Care Workers Are Tired of Cleaning Up Palantir's Mess

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** A major hospital giant and radiology network is experiencing significant operational disruption due to Palantir's newly implemented scheduling software.
- **Who:** Palantir, a prominent data analytics company, and a large healthcare provider are the primary entities in this critical software implementation conflict.
- **What it does:** The scheduling software deployment by Palantir is reportedly causing critical operational errors, staff burnout, and widespread frustration within the healthcare network.
- **Why it matters:** This incident highlights the critical risks of poorly implemented enterprise technology solutions on operational efficiency, employee morale, and potentially patient care.
- **Strategic view:** TMT leaders must prioritize robust change management, user-centric design, and clear ROI for enterprise software deployments, critical for avoiding reputational damage and significant operational disruptions.

Whatever AI Safety Is, It's Not This

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** This news concerns a development related to Whatever AI Safety Is, It's Not This.
- **Who:** The main actors involved include Wired – Business and ecosystem partners.
- **What it does:** It introduces or describes concrete changes in products, services or capabilities in the technology stack.
- **Why it matters:** It may influence strategy, infrastructure, partnerships or competition for Telco, Media and Tech players.
- **Strategic view:** Over the next 6-24 months, this move could reshape positioning, ecosystem relationships and investment priorities.
