3 deep-dives you should really read

Batteries just broke another record in the US

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** New battery storage capacity installations in the US reached a record high of 20.2 gigawatt-hours in Q2 2026, significantly boosting grid capabilities.
- **Who:** The US energy sector, driven by utility-scale projects and supported by policy, is deploying record amounts of battery storage capacity.
- **What it does:** This record surge enables the daily electricity needs of approximately 700,000 homes, significantly enhancing grid stability and renewable energy integration.
- **Why it matters:** The rapid expansion of battery storage is crucial for modernizing national energy infrastructure, ensuring reliable power supply, and accelerating the transition to renewables.
- **Strategic view:** For TMT, robust energy storage infrastructure reduces operational costs, enhances data center reliability, and unlocks new distributed energy business models and connectivity services.

What OpenAI's latest controversy tells us about the future of math

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** OpenAI announced its AI agents have solved a Millennium Prize Problem, marking a contentious milestone in artificial intelligence capabilities.
- **Who:** OpenAI, a leading artificial intelligence research company, developed the advanced agents achieving this controversial mathematical breakthrough.
- **What it does:** The company's AI agents reportedly solved one of mathematics' most important open problems, showcasing unprecedented machine intelligence and reasoning potential.
- **Why it matters:** This event signifies a dramatic advancement in AI's capacity for complex problem-solving, potentially revolutionizing scientific discovery and intellectual work paradigms.
- **Strategic view:** TMT executives should recognize AI's accelerating ability to automate complex intellectual tasks, necessitating strategic re-evaluation of research, development, and future workforce skill requirements.

The Download: our 35 Innovators Under 35 this year

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** MIT Technology Review has released its annual '35 Innovators Under 35' list for 2026, showcasing emerging leaders in science and technology.
- **Who:** MIT Technology Review annually identifies 35 young scientists and technologists who are poised to significantly impact the future across various fields.
- **What it does:** This list identifies and spotlights the next generation of scientific and technological pioneers, offering insight into future industry directions and disruptions.
- **Why it matters:** It provides a curated look at potential future talent, disruptive technologies, and emerging trends that will shape market opportunities and competitive landscapes.
- **Strategic view:** Executives should leverage such lists to anticipate future talent wars, identify investment targets in nascent technologies, and strategically adapt long-term innovation roadmaps.
