3 deep-dives you should really read

The Download: biotech's future and cheaper, cleaner steel

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** This report highlights the annual recognition of young innovators under 35 who are actively shaping the future landscape of biotechnology.
- **Who:** MIT Technology Review is the entity compiling its prestigious annual list of 35 Innovators Under 35.
- **What it does:** It identifies and showcases exceptional young minds whose work is driving significant advancements and innovation within the biotech industry.
- **Why it matters:** This recognition provides valuable insight into emerging trends and potential disruptions, crucial for strategic planning across technology-driven sectors.
- **Strategic view:** For TMT executives, understanding these pioneering biotech developments offers opportunities for diversification, M&A, and long-term innovation investment strategies.

Roundtables: AI's apocalypse crisis

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** MIT Technology Review is hosting a critical discussion about claims from leading AI lab employees regarding the potential for advanced artificial intelligence to destroy humanity.
- **Who:** The discussion features MIT Technology Review editors Niall Firth, Will Douglas Heaven, and Grace Huckins, responding to concerns voiced by employees at prominent AI development labs.
- **What it does:** This roundtable unpacks the serious claims about AI extinction, exploring whether these are legitimate concerns or merely exaggerated hype surrounding advanced artificial intelligence capabilities.
- **Why it matters:** This internal debate from AI's creators signals escalating societal and regulatory scrutiny over AI development, potentially affecting public trust, investment, and future policy decisions for TMT companies.
- **Strategic view:** TMT leaders must strategically address the growing public and expert concerns about AI's existential risks, ensuring responsible innovation while anticipating potential regulatory frameworks and ethical demands.

The US Government Launched 3 Previously Unreported Investigations of Polymarket Trades

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** US regulators have initiated previously undisclosed investigations into Polymarket's decentralized prediction market trades concerning high-stakes political and corporate events.
- **Who:** The Commodity Futures Trading Commission (CFTC) is investigating Polymarket, a blockchain-based prediction market platform, and its users regarding various trade activities.
- **What it does:** This action signifies intensified regulatory scrutiny by US authorities over the operations and user activities within decentralized blockchain-based prediction markets.
- **Why it matters:** It highlights rising regulatory risks for decentralized finance (DeFi) platforms and blockchain applications, impacting their compliance obligations and potential for mainstream adoption.
- **Strategic view:** TMT firms leveraging blockchain must prioritize robust compliance and actively monitor regulatory shifts to mitigate significant legal and reputational risks in emerging decentralized markets.
