3 deep-dives you should really read

These new solid-state ACs promise a cool future. Scientists aren't so sure.

MIT Technology Review – Tech · Topic: **AI/Cloud/Quantum**

- **What it is:** This refers to a new generation of solid-state air conditioning units, envisioned as a more sustainable alternative to conventional AC technology.
- **Who:** Scientists express skepticism regarding the near-term viability and broad environmental benefits promised by emerging solid-state air conditioning technologies.
- **What it does:** Solid-state air conditioners aim to provide efficient cooling for homes and businesses, potentially reducing the significant energy consumption and environmental impact of traditional AC units.
- **Why it matters:** This technology matters due to the projected tripling of AC units by 2050, offering a potential solution to mitigate the immense environmental and energy strain of conventional cooling systems.
- **Strategic view:** Telco, Media, and Tech executives should cautiously monitor solid-state AC advancements as a future opportunity for sustainable infrastructure and smart home integration, weighing scientific skepticism against potential market disruption.

The UK Places a Sweeping Ban on Social Media for Kids Under 16

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** A new UK government legislative measure will ban social media access for children under 16 and impose age limits on some chatbots to protect young users from online dangers.
- **Who:** The UK government is implementing this regulation, impacting children under 16, their parents, and social media platforms, along with chatbot providers.
- **What it does:** This legislation prohibits social media use for children under 16 and establishes a minimum age requirement for specific chatbot services to enhance youth online safety.
- **Why it matters:** This initiative matters significantly as it aims to safeguard young people from online harms, potentially setting a precedent for other nations and forcing significant compliance changes for tech companies.
- **Strategic view:** For TMT executives, this signals increasing regulatory scrutiny over youth online safety, demanding robust age verification, content moderation, and potentially impacting user acquisition strategies and global market approaches.

Meta Tapped a Pentagon Supplier to Prototype Face Recognition for Its Glasses

Wired – Business · Topic: **AI/Cloud/Quantum**

- **What it is:** This news concerns a development related to Meta Tapped a Pentagon Supplier to Prototype Face Recognition for Its Glasses.
- **Who:** The main actors involved include Wired – Business and ecosystem partners.
- **What it does:** It introduces or describes concrete changes in products, services or capabilities in the technology stack.
- **Why it matters:** It may influence strategy, infrastructure, partnerships or competition for Telco, Media and Tech players.
- **Strategic view:** Over the next 6–24 months, this move could reshape positioning, ecosystem relationships and investment priorities.
