Talking to AI agents is one thing — what about when they talk to each other? New startup BAND debuts 'universal orchestrator'

VentureBeat – AI · Topic: **AI/Cloud/Quantum**

- **What it is:** BAND is a new startup providing a universal orchestrator and deterministic communication layer designed to facilitate seamless, multi-peer interaction between disparate AI agents.
- **Who:** BAND, a newly-funded startup also known as Thenvoi AI Ltd., has launched a platform to enable complex, coordinated workflows among diverse AI agents for enterprises.
- **What it does:** BAND's platform establishes an 'agentic mesh' for multi-peer AI communication and a 'Control Plane' for governance, enabling secure, contextual interaction across various AI agents and frameworks.
- **Why it matters:** This solution is crucial because it overcomes the current fragmentation of AI agents, transforming isolated tools into a unified, scalable workforce and accelerating enterprise AI adoption.
- **Strategic view:** For TMT executives, BAND enables strategic flexibility by fostering truly collaborative, framework-agnostic AI agent ecosystems, mitigating vendor lock-in, and providing essential governance for scaled autonomous operations.
